In eukaryotes DNA is found in nucleus on multiple linear chromosomes (a chromosome IS a strand of DNA with proteins etc. associated). In
prokaryotes DNA is not in a nucleus and is usually a single circular chromosome. Prokaryotes, viruses, and eukaryotes (yeast) can contain plasmids (small extra-chromosomal DNA that is

The Molecular Basis of Heredity Molecular biology seeks to explain living organisms by studying them at the molecular level, using molecules like DNA and RNA. The central dogma of molecular biology is that information is transferred from DNA to RNA to protein. Gene expression is the way in which DNA, RNA, and proteins are involved in putting
