A facelift, technically known as a rhytidectomy (from Ancient Greek ?????? (rhytis) "wrinkle" + ??????? (ektome) "excision", surgical removal of wrinkles), is a type of cosmetic surgery procedure used to give a more youthful facial appearance. There are multiple surgical techniques and exercise routines. Surgery usually involves the removal of excess facial skin, with or without the ...

Rhytidectomy — Wikipedia
Dr. Coleman’s meta-analysis excluded weak and potentially biased studies by including only studies that (1) were published in a peer-reviewed journal, (2) had at least 100 participants in the sample, (3) used comparison groups (e.g., women with unintended pregnancy who delivered, women with pregnancy who delivered, and women who had not had an abortion), (4) measured one or more mental ...

Dissection 5. Pelvis and Perineum This guide to dissection replaces the assigned pages in Grant's Dissector. Its goals are: 1) to orient you and prepare you in advance for this dissection, and 2) to take you through the dissection in an orderly and logical way, highlighting important structural and functional relationships in the pelvis and perineum.

The best-known feature of skeletal muscle is its ability to contract and cause movement. Skeletal muscles act not only to produce movement but also to stop movement, such as resisting gravity to maintain posture.

10.2 Skeletal Muscle — Anatomy and Physiology
Advanced Placement classes were once limited to select groups of students, but today, these classes dominate the high school experience. During the 2016-2017 school year, 111,000 students in American schools took the computer science course with a growth of more than 54,000 students from the previous year.

Light sheet fluorescence microscopy (LSFM) is a fluorescence microscopy technique with an intermediate-to-high optical resolution, but good optical sectioning capabilities and high speed. In contrast to epifluorescence microscopy only a thin slice (usually a few hundred nanometers to a few micrometers) of the sample is illuminated perpendicularly to the direction of observation.

Light sheet fluorescence microscopy — Wikipedia
Announcement Lyon Road Art specializes in abstract anatomy art. Each print is created from a hand-painted watercolor or oil piece by renowned medical artist Kaitlin Walsh. She is now taking on commission for original work.

**Figure 2. Periosteum and Endosteum.** The periosteum forms the outer surface of bone, and the endosteum lines the medullary cavity. Flat bones, like those of the cranium, consist of a layer of diploë (spongy bone), lined on either side by a layer of compact bone. The two layers of compact bone and the interior spongy bone work together to protect the internal organs.

Nursing assessment is an important step of the whole nursing process. Assessment can be called the “base or foundation” of the nursing process. With a weak or incorrect assessment, nurses can create an incorrect nursing diagnosis and plans therefore creating wrong interventions and evaluation. To prevent those kind of scenarios, we have created a cheat sheet that you can print and use to ...
