Traffic Engineering Solutions Manual by Hay House

**Traffic Engineering Solutions Manual**

Traffic engineering principles are integral to the safe and efficient movement of people and products across the Commonwealth. Traffic engineering is the phase of Virginia Department of Transportation which deals with safe, economical, and efficient traffic movement on roads, streets, and highways, their networks, terminals, and abutting lands.

The Manual on Uniform Traffic Control Devices for Streets and Highways, or MUTCD defines the standards used by road managers nationwide to install and maintain traffic control devices on all public streets, highways, bikeways, and private roads open to public travel. The MUTCD is published by the Federal Highway Administration (FHWA) under 23 Code of Federal Regulations (CFR), Part 655, Subpart F.

The design and applications of traffic control devices used in temporary traffic control zones are described in this chapter. A traffic control device is a sign, signal, marking or other device placed on or adjacent to a street or highway (by authority of a public body or official having jurisdiction), to regulate, warn, or guide traffic.
